Machine Learning Engineer | Full Stack Developer

Professional Summary

Machine Learning & Full-Stack Engineer experienced in building AI-powered applications and secure, scalable web systems using Python, Django, and TensorFlow. Skilled in developing predictive models and QR-based authentication systems with measurable business impact. Striving to build intelligent and efficient products that bridge AI and software engineering.

Technical Skills

AI/ML: Scikit-learn, Keras, Pandas, NumPy

Web Development: Django, DRF, HTML, CSS, QR Auth Systems

Programming: Python (Advanced), SQL, Java (Basic)

Tools: Git, VS Code, Jupyter, Figma, ChatGPT Prompting

Projects

- College Gate Pass System | Django, QR Auth | [GitHub](#)
 - Built web-based gate pass system with QR-based authentication
 - Reduced approvals by 90% and unauthorized entries by 75%
 - Deployed with Django REST, MySQL
- Car Sales Price Prediction | Scikit-learn, Python | [GitHub](#) | [Live](#)
 - Built a machine learning model to predict car prices using regression algorithms from Scikit-learn
 - Achieved 88% accuracy on test data by tuning model hyperparameters
 - Improved performance by 15% through feature engineering and preprocessing
 - Performed data visualization with Seaborn to identify patterns and outliers
- AI-Generated Fitness Platform | v0.dev, ChatGPT, Python (Planned)
 - Designed a fitness website using AI-assisted tools to accelerate development and UI prototyping
 - Built 50+ reusable UI components, reducing development time by 90%
 - Automated component and content generation through custom prompts and workflows
 - Planned backend integration with REST API and user authentication (in progress)

Education

- Bachelor of Technology in Computer Science & Artificial Intelligence
 - St. John's College of Engineering and Technology, Kurnool | 2022-2026
- Intermediate (MPC)
 - Narayana Jr. College, Kurnool | 2020 - 2022

Certifications

Python & Problem Solving – [HackerRank](#)

Python & Data Science – [Kaggle](#)

Machine Learning – [Skill Vertex](#)

Data Analytics & Cyber Security – [Deloitte \(Forage\)](#)

Data Visualization – [TATA \(Forage\)](#)

Achievements

- Participated in JIGNASA 2024 technical event
- Earned multiple HackerRank and Google Cloud skill badges

Additional

Languages: English (Professional), Telugu (Native)

Interests: AI Research, Web Dev, Competitive Programming
